twitter.com/Survant_project

SURVANT INTEGRATED SYSTEM

- Smart Video Analytics
- Rich content-based search
- Complex query formulation
- Interoperability
- Scalability
- GDPR compliance
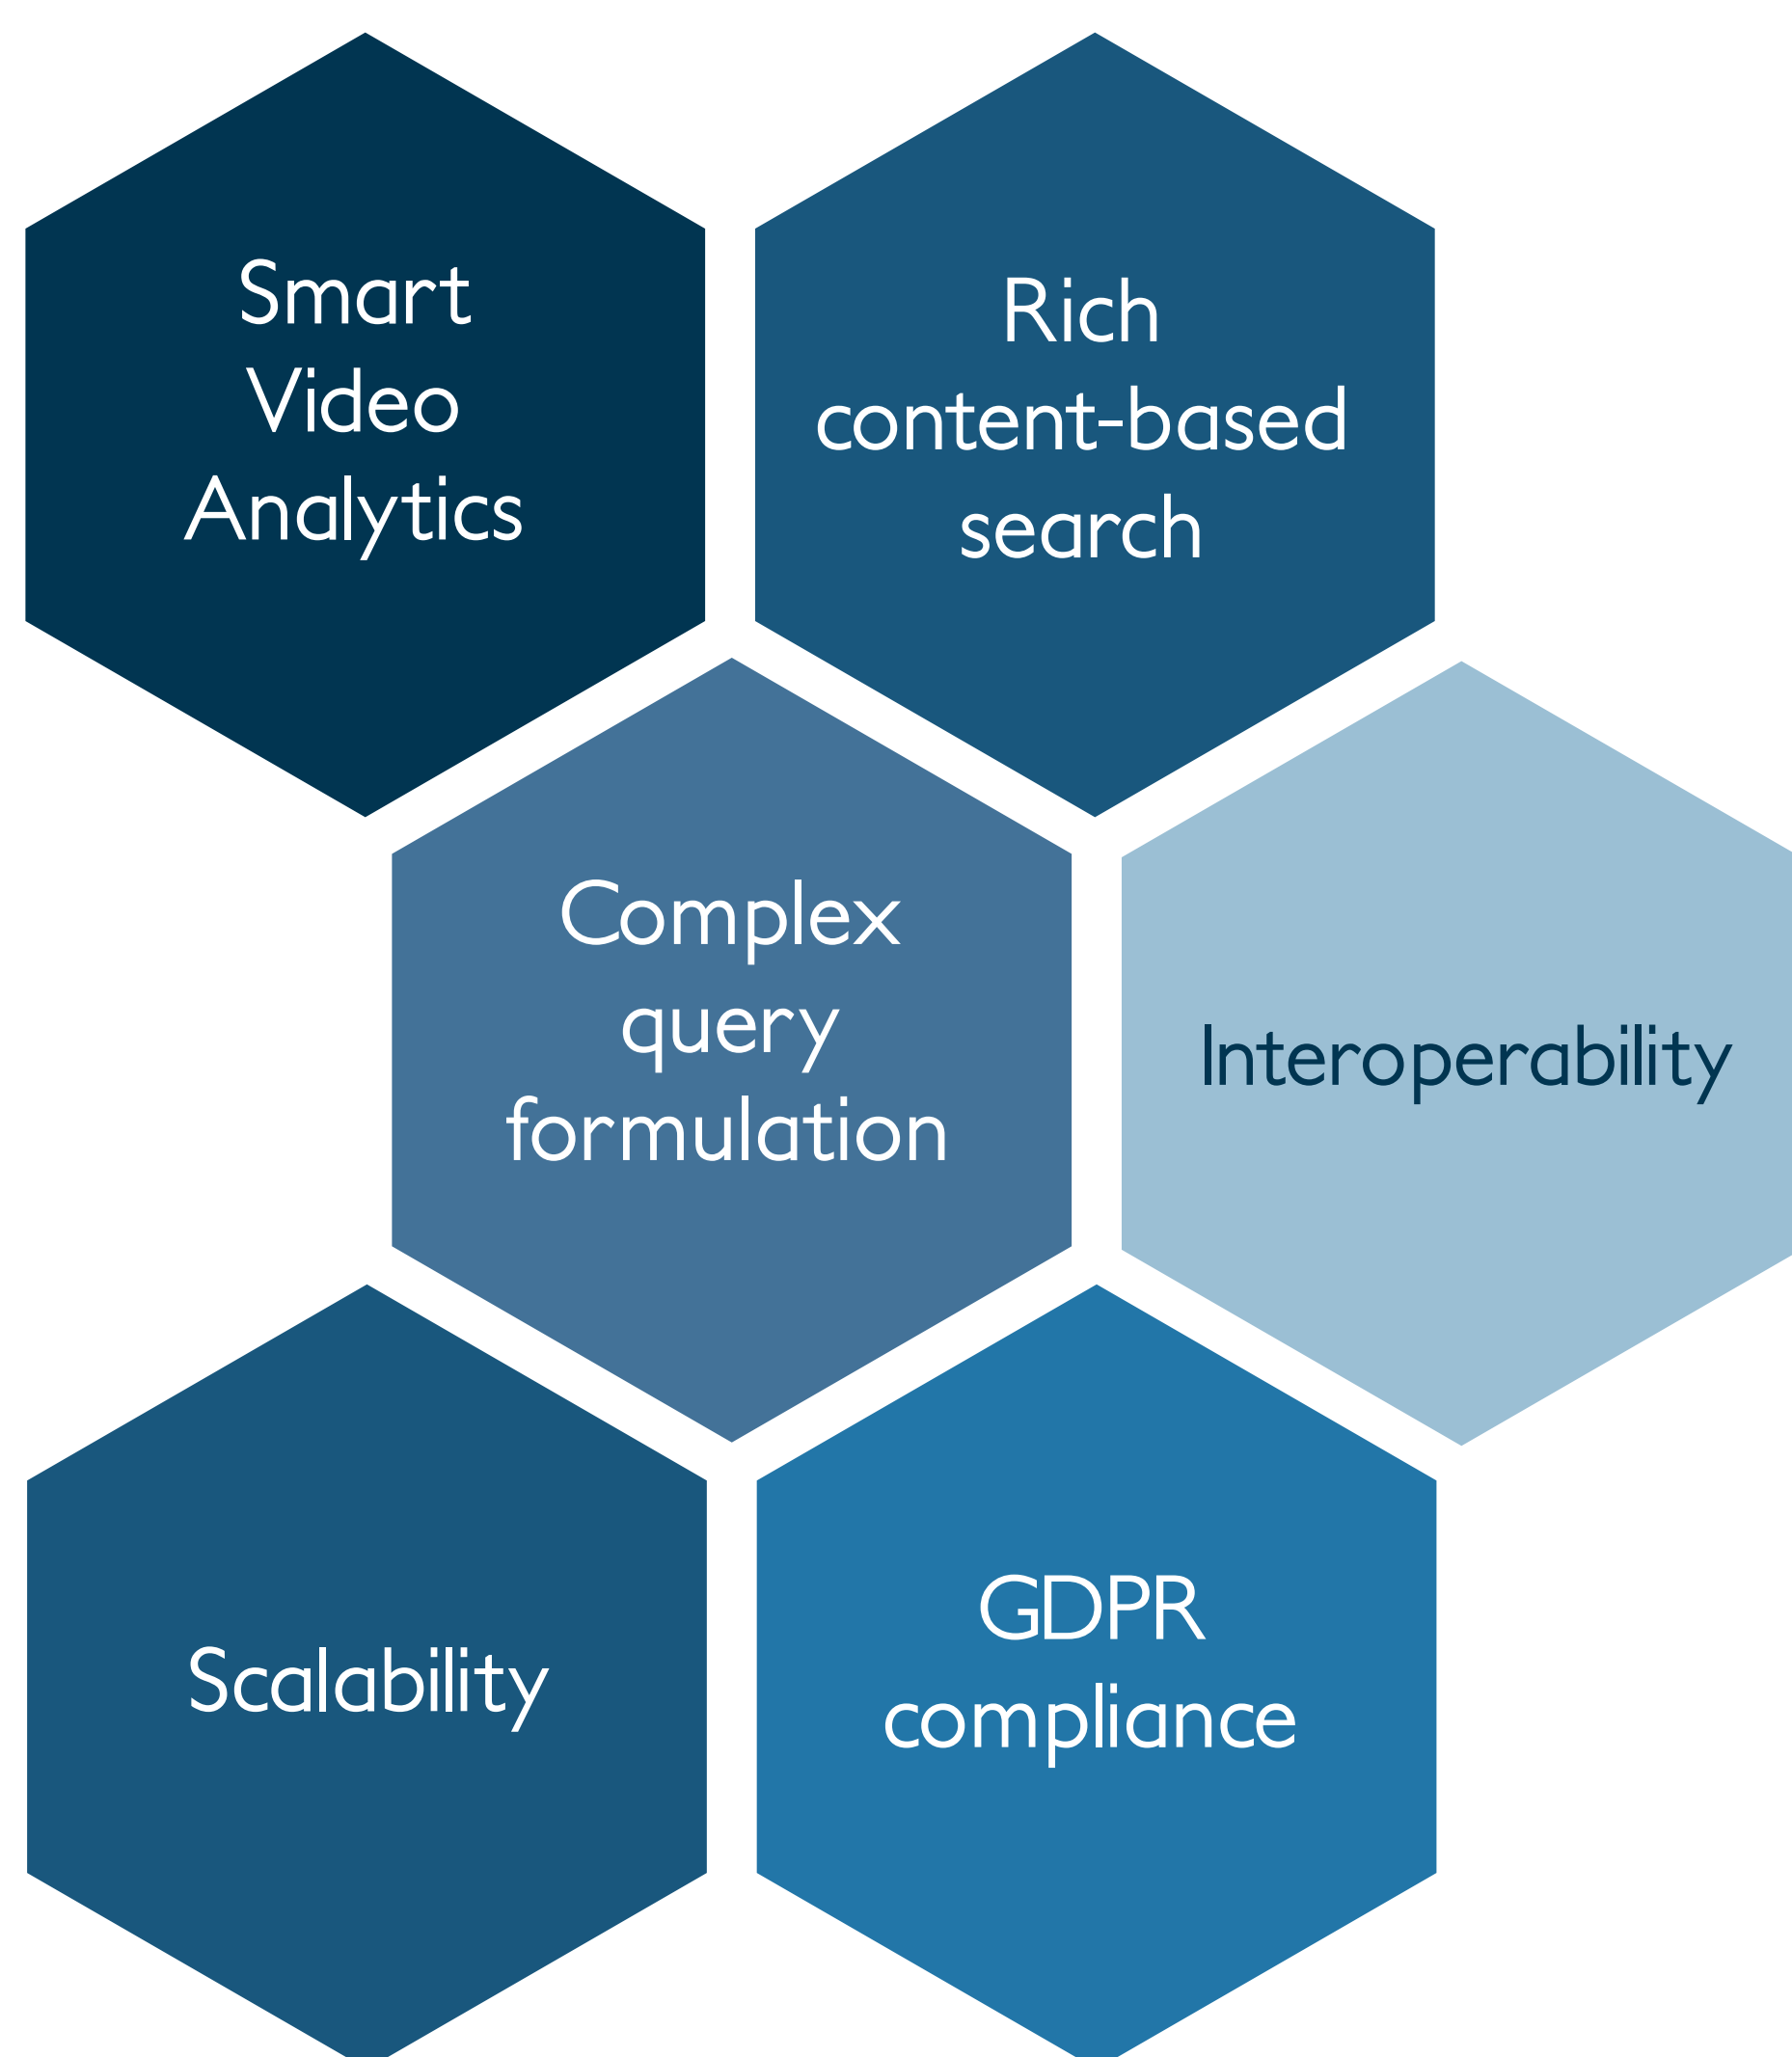

MULTIPLE COMPETITIVE FEATURES

- Combine state-of-the-art video analysis tools with search assistance tools, hence providing advanced technological progress with advanced content-based search functionality and smart hints provision to minimize manual examination

- Ease query formulation, prompt and efficient geo-localization of suspicious events and sketched visualization of results

- Integration of multiple modules comprising high-quality software for pre- and post-processing of recorded video archives

- Ensure for interoperability of heterogeneous data, also enabling the results' translation to a common format

- Secure information and content exchanges, while ensuring data integrity and ethical and privacy compliance by embracing Privacy Impact Assessment

- Privacy risks mitigation implemented by means of transparency principles, hence promoting stakeholders' trustworthiness in legal, privacy and data protection related concerns.
